CLASS 7861 35 - CUSTOM TESTING - Mechanical Products

CSA International has completed an evaluation, under CSA's Special Contract/Attestation Program for Class 7861 35, of the following product :

- Working Platform Cat. No. 520, designed to accomodate one person max and meant to be mounted and secured temporarily under the blades of a typical fork lift truck. To be used in conjunction with appropriate CSA Certified Safety Body Belts and Lanyards (Fall Arresting Devices Class 7216, 7219, 7220..., CSA Standards Z259's Series)

and hereby attests that this product complies to the applicable Clauses of Section 7.35* of the following standard, to the scope of applications planned by the design:

- ASME B56.1-1993 - Safety Standard for Low Lift and High Lift Trucks (Replacing the former CSA Standard No. B335.1-1977 "Low Lift and High Lift Trucks")
- ASME B56.1a-1995 - Addenda to ASME B56.1-1993 - Safety Standard for Low Lift and High Lift Trucks

****with the following exceptions as the above Standard is not a specific Standard for that product only :***

- Clause 7.35.2 : as not applicable (this product not being or designed as an "Operator platform");
- Clause 7.35.3 (f) : as an overhead guard was purposely not included in the design of this product and the product is not to be sold to a user requesting such an option. The product would simply not be sold to the user if this option is requested by the user.
